## SECTION 4- FIRST AID MEASURES

### FIRST AID PROCEDURES:

**Eyes:** Flush with large amounts of cool running water for at least 15 minutes. If irritation persists seek medical attention.

**Skin:** Remove contaminated clothing. Wash exposed skin with soap and water. If severe irritation develops seek medical attention.

**Inhalation:** For excessive inhalation remove to fresh air. If breathing is difficult or tightness of the chest, is dizzy or lethargic give oxygen. Seek medical attention.

**Ingestion:** DO NOT induce vomiting unless instructed by a physician. Drink large quantities of water or milk. Seek medical attention.

## SECTION 5 - FIRE FIGHTING MEASURES

**Extinguishing Media:** To extinguish flames use water fog, dry chemical, carbon dioxide or foam to extinguish flames.

**Fire Fighting Procedures:** EXTREMELY FLAMMABLE! Evacuate the area. Cool fire-exposed containers with water fog to prevent container weakening and possible rupture. Self-contained breathing apparatus (SCBA) in positive pressure mode, full bunker gear or structural firefighter's protective clothing are recommended.

**Fire and Explosion Hazards:** Vapors are heavier than air. Concentrated vapors will travel great distances and can be ignited by an open ignition source causing a flashback fire danger.

## SECTION 6 - ACCIDENTAL RELEASE AND DISPOSAL MEASURES

**Small Spill:** Stop source of spill. Remove all ignition sources. Salvage as much material as possible for possible re-use. Absorb residual on inert media and collect into suitable container.

**Large Spill:** Shut off or plug source of spill. Dike spill area to contain spill. Salvage as much material as possible for possible re-use. Absorb residual on inert media and collect into suitable container. Avoid contaminating ground and surface water.

**Waste Disposal Method:** Do not flush to drain. Follow local, state and federal regulations for disposal.

## SECTION 7 - STORAGE AND HANDLING

**Precautions To Be Taken In Handling and Storage:** Do not use in confined spaces. Always store in tightly sealed, properly labeled original container. Containers should be grounded to prevent static sparks. Store in a cool, dry well ventilated area, away from acute fire hazards. Use non-sparking tools and equipment.

**Other Precautions:** Follow Label Instructions and Precautions.

## SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

**Engineering Controls:** Provide explosion-proof ventilation or other engineering controls to keep the airborne concentrations of vapor or mists below the applicable workplace exposure limits indicated below.

<b>Exposure Limits:</b>	Hexane	50 ppm ACGIH; 500 ppm OSHA
	Isopropyl Alcohol	400 ppm ACGIH; 400 ppm OSHA
	Methanol	200 ppm ACGIH; 200 ppm OSHA

### Personal Protective Equipment (PPE):

**Eyes:** Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133.

**Skin:** If prolonged or repeated skin contact is likely, wear appropriate protective gloves.

**Clothing:** Selection of protective clothing depends on work conditions, potential exposure conditions and may include gloves, boots, suits and other protective items.

**Respirators:** Where adequate ventilation is not available an approved respirator must be worn. Respirator selection, use and maintenance should be in accordance with the requirements of OSHA Respiratory Protection Standard, 29 CFR 1920.134. In confined areas, use a self-contained breathing apparatus.

**Other Equipment:** Eye wash station and shower in close proximity to use are advised.

## SECTION 11 - TOXICOLOGICAL INFORMATION

**Skin:** Repeated or prolonged contact can cause redness, irritation, cracking and dryness.

**Eyes:** Liquid contact may cause temporary discomfort, redness and stinging. Vapors may be irritating to the eyes.

**Inhalation:** High vapor concentrations may be irritating to the respiratory tract. Breathing of vapor may cause central nervous system depression, resulting in dizziness, light-headedness, headache, and loss of coordination.

**Ingestion:** Liquid can directly enter the lungs (aspiration) when swallowed or vomited. Serious lung damage may result and possibly fatal chemical pneumonia can develop if this occurs.
