

Colonial Chemical Solutions, Inc.

A Subsidiary of Colonial Group, Inc.

Growing a Business. Building a Family.

Colonial Chemical Solutions, Inc. is AIB Certified

Colonial Chemical Solutions, Inc. is pleased to announce our distribution centers in Savannah and Atlanta, GA have received Certificates of Achievement from the American Institute of Baking (AIB). Receiving these certifications means Colonial Chemical Solutions meets or exceeds best practices and strict

regulatory requirements for food center distribution. These certifications demonstrate our commitment to safety, quality, customers and continuous improvement.

Pepsi, Kroger and McCain Foods are just a few of the names that also use AIB international standards to protect the quality of their products and the safety of their work environment. Although it is not a requirement, we voluntarily have a third party audit conducted by AIB to ensure the highest possible quality and uphold safe working conditions.

Colonial Chemicals strives for superior customer service and we are always looking for ways to improve and grow our business with our customers' needs and future needs as a top priority. The AIB certifications is not only a benefit to our employees and customers in the food industry, but also to all of our customers. It advances our capability to meet our customers' requirements. It also gives customers confidence in the quality and safety of our products and facilities.

We have a drive to continuously improve in all aspects of our business. We have been able to achieve these certifications by having dedicated employees, who have a desire to learn and grow with Colonial Chemicals. We have put limitless effort into achieving these significant certifications. This provides our customers with added assurance our products will meet or exceed high quality and safety standards.

We continually add products and services, such as AIB certified storage and distribution, for further improvement.

What is AIB?

Since its founding by the baking industry in 1919, AIB has grown to include certification programs for protecting the safety of the food supply chain in a variety of food processing, distribution, foodservice, and retail industries worldwide. AIB is a pioneer and leader in food safety auditing and education. AIB certification requires rigorous quality control processes and programs be in place to ensure contamination-free products for the food industry.

AIB certification is achieved by meeting AIB's consolidated standards for inspection of food distribution centers, which inspects and audits the facilities, processes and procedures related to food handling and processing, equipment maintenance, cleaning practices, pest management, and food safety programs. The certification is awarded to companies that have exemplified quality, exceptional food safety and sanitary working conditions in their facilities, and have superior training for their employees on proper product handling.
