Operations

CCS is situated on a deep water terminal, adjacent to a leading east coast container terminal and has 300,000 gallons of rail serviced tank capacity allowing us to strategically source products for you. We have the ability to receive products by vessel, rail, tanker or container to transload or package from 8-trailer bays at 4 locations in SE US. These capabilities allow us to provide our customers unparalleled supply chain flexibility.

CCS operates Feige semi-automatic filling systems offering precise packaging, while also providing a safer working environment for our dedicated employees.

Custom Blending and Packaging

CCS offers custom blend and packaging solutions. Blending formulations can be tailored to your specific needs from dry to liquid additions and batches as small as 50 gallons up to 6000 gallons. Whether you prefer pails, drums, totes, truck or rail, we can deliver in the package you need.

Truck Fleet

The experienced and growing CCS team of hazmat drivers operate a fleet sized for our extensive product line and varying customer needs. We extend beyond the southeast by maintaining strong relationships with our outside carriers and rail providers.

Quality Control and Assurance Lab

State of the art instrumentation ensures tight manufacturing tolerances. CCS is an NACD Responsible Distributor and our on site quality control works to adhere to product quality requirements. Our QC lab provides analytical support ensuring a quality product is delivered every time.

Warehouses

With over 535,000 sq. ft. of warehouse space and 38 acres of industrial land in Savannah, GA, Atlanta, GA, Charlotte, NC, and Richmond, VA, CCS is well positioned to supply the chemical needs of our customers. We operate temperature controlled and food grade AIB certified warehouse space .
